SUMMARY

I'm Jesryl S. Palmes, a BS in Information System graduate with hands-on experience in web development and a solid understanding of IT support concepts. I completed the Software Development Training Program (SDTP) at Coders Tribe – NOLITC, where I worked on real-world projects that strengthened my skills in front-end development, teamwork, and problem-solving. I'm passionate about technology, eager to learn new skillsets, and excited to grow in a dynamic IT environment.

PROJECTS

- THYNK

Group Project during SDTP at Coders Tribe – NOLITC (2025)

A business productivity platform designed for idea organization and collaboration. My role involved front-end design, form handling, and UI optimization.

- BAGO SCOUT

Capstone Project at Bago City College (2024)

A comprehensive citywide scouting platform built with geolocation, event listings, and digital profiles for scouts in Bago City.

- PENGUIN SALES & SERVICES COMPANY – WEBSITE ENHANCEMENT

Revamped and modernized a company's existing website. Focused on UI redesign, responsiveness, and improved navigation to enhance user engagement.

- STOCKFLOW

A simple static inventory management web app with full CRUD functionality (Create, Read, Update, Delete). Built using HTML, CSS, JavaScript.
